Model CRI500-20 mm

Model CRI500-13 mm

Model CRI500-32 mm

Technical SPECIFICATION

Model
CRI500

Throughput
30,000 pieces/hour

Power
415 v 4 Amp

Dimension
3200 x 1150 x 2350 (mm)

Frequency
3 Phase 50 Hz

Air
6/7 Kg/cm²

Weight
900 Kg approx

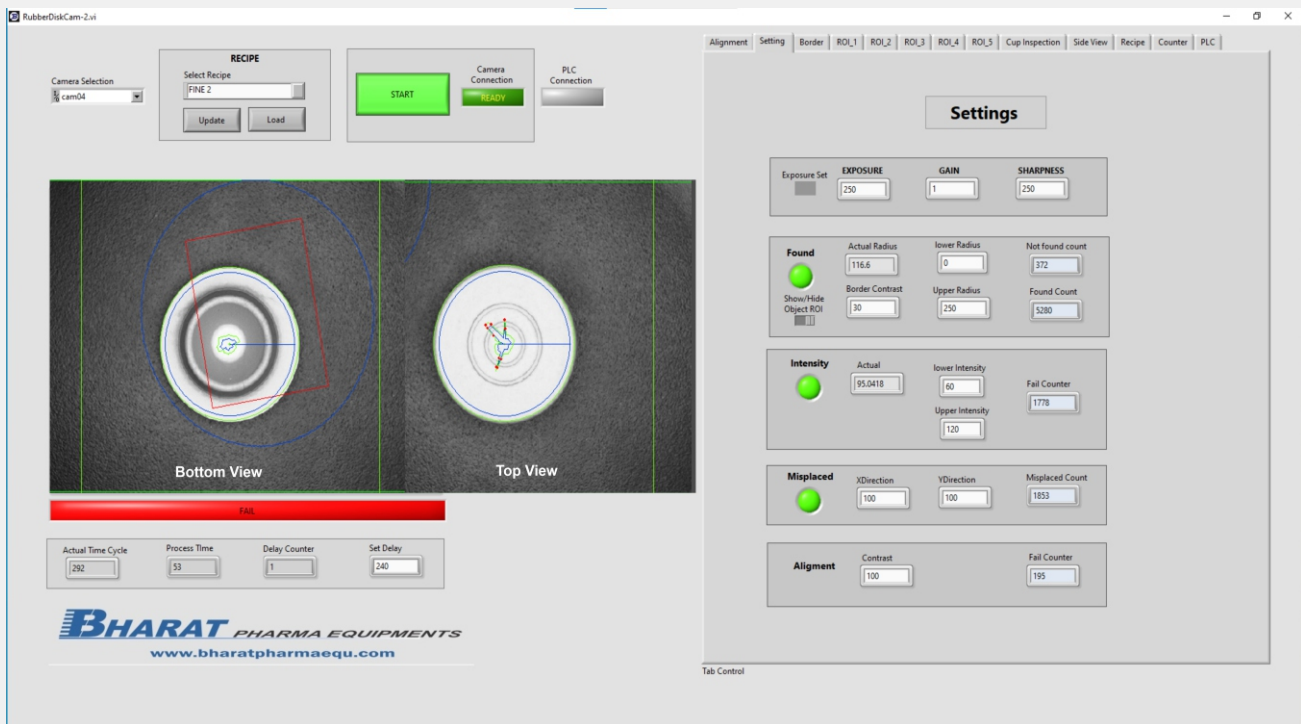

Stopper Size
13 , 20 , 32 (mm)

Hopper Capacity
13 mm - 70,000 pieces approx
20 mm - 40,000 pieces approx
32 mm - 25,000 pieces approx

Products OVERVIEW

This machine is totally automatic for inspecting rubber stoppers. The machine's main body is constructed of stainless steel, and a glass cabinet covers the upper part of the machine to keep out dust. The operator feeds the material into the hopper of this machine. After that, material is transported via lift to a rotary vibrator. Material is fed into a feeder conveyor by a rotary vibrator. The rubber stopper then transitions to rotating. The pick-up roller mechanism provides excellent timing for the action, which results in perfect time for taking the picture. To identify faults with the rubber stopper, two cameras are placed on the rotary. Four high-definition cameras are used for the task, two of which on rotary to inspected the stopper's top side. The stopper's bottom sides are inspected by the other two cameras. The horizontal flash, black spot, white spot, and cuts are the kinds of defects that the camera can capture. The stopper now moves to the station for rejection, where the rejected stopper is blown away using an air nozzle. The accepted piece will be processed further in a good piece crate. All this processing is done by state-of-the art mechanisms.

About Us

Bharat Pharma Equipment is located in Odhav, Ahmedabad, Gujarat. Our journey began in 1998. Our hunger to grow helped us stand out in a competitive market through innovation and service. We are specialists in the design, manufacturing, and solution of automated vision inspection systems. These systems include material handling, machine control, and rejected part sorting in conjunction with the camera. Since 1998, we have supplied a wide range of machine vision solutions to our manufacturing customers in the pharmaceutical, automotive, and cosmetic industries.
