Model PCI1000

Cap Dia:16,19,22,25,28,35(mm)

Technical SPECIFICATION

Model
CRI500

Throughput
30,000 pieces/hour

Power
415 v 4 Amp

Dimension
3800 x 1150 x 2350 (mm)

Frequency
3 Phase 50 Hz

Air
6/7 Kg/cm²

Weight
900 Kg approx

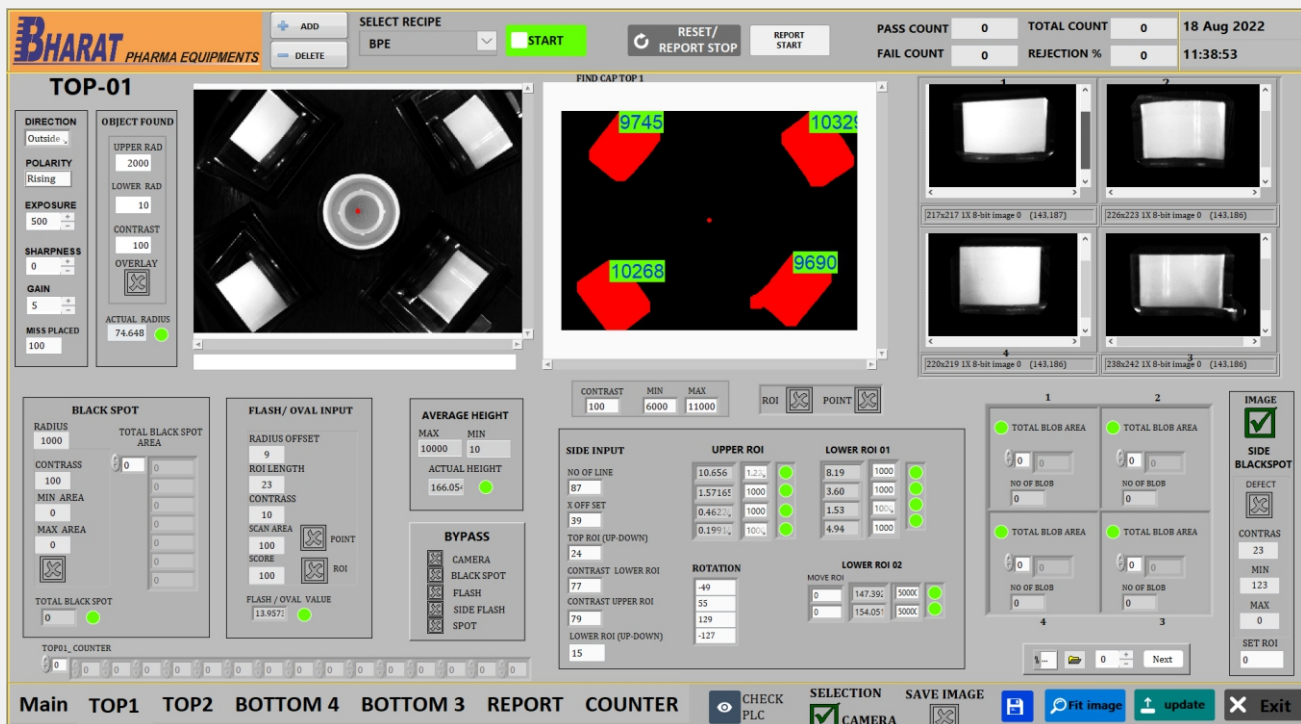

Cap Size
16,19,22,25,28,35 (mm)

Hopper Capacity
40,000 pieces approx

Products OVERVIEW

This is a high-speed, fully automated cap inspection machines. The machine's main body is made of stainless steel, and the upper portion of the machine is covered by a glass cabinet, which prevents dust from entering the machine. The operator fills the hopper with material. The material is then lifted to the rotary vibrator by elevator. The material is fed to the feeder conveyor using a rotary vibrator. The cap is faded to rotary. The pick-up roller mechanism provides precise timing. This provides a perfect time for image capture. Two cameras are mounted on a rotary in order to identify defects in plastic caps. The task is done by four high-definition cameras, two of which are mounted on a rotary and inspect the front side of the caps as well as the circular sides of the caps using four high-quality mirrors. The other two cameras inspect the bottom sides of the cap. vertical flash, horizontal flash, blackspot, and cut are the defects covered by the camera. Caps are then carried forward to the rejection station, where rejected caps are removed using an air nozzle. Accepted pieces will be placed in the good piece crate for further processing. This entire procedure is carried out using a high-speed 1000 ppm state-of-the-art mechanism.

About Us

Bharat Pharma Equipment is located in Odhav, Ahmedabad, Gujarat. Our journey began in 1998. Our hunger to grow helped us stand out in a competitive market through innovation and service. We are specialists in the design, manufacturing, and solution of automated vision inspection systems. These systems include material handling, machine control, and rejected part sorting in conjunction with the camera. Since 1998, we have supplied a wide range of machine vision solutions to our manufacturing customers in the pharmaceutical, automotive, and cosmetic industries.
